

Research Opportunities Request Form

Please use this form to describe the involvement required from Brisbane South PHN, to fulfill this request, and return it via email to research@bsphn.org.au

We will endeavour to respond to submissions within 4 weeks. Submissions that do not align with one of our local priorities will not be considered. If you require an urgent response, please indicate your deadline in your email and flag as 'high importance' and we will do our best to accommodate your request. Due to our internal governance process, no requests to promote surveys or studies/trials will be considered without at least 7 days' notice. Letters of support require a longer timeframe of notice. We prioritise partnering on letters of support when a Brisbane South PHN contact is identified. Unsolicited requests for letters of support will not be considered.

Please note: Brisbane South PHN will not generally consider requests which are only for patient recruitment and do not have a health professional audience.

Please click the link to our local priorities on the webpage that most aligns with your research to email your request to our team. For any questions regarding the application process, contact research@bsphn.org.au
