

HPOS, PRODA and PKI Certificates

Health Professional Online Services (HPOS) offers improved access to Medicare Australia's online services for health professionals and delegated practice staff.

HPOS provides access to information on medical practitioner eligibility for Medicare and information necessary for the processing and payment of claims. In addition, HPOS services are in real-time.

HPOS also allows administrative users, such as practice staff, to logon to HPOS using a Public Key Infrastructure (PKI) individual certificate and act as a delegate on behalf of a health professional. The health professional must first nominate the delegate to act on their behalf.

Administrative users can also logon to HPOS using a PKI site certificate which provides access to patient verification only.

When acting on behalf of a health professional, you will have access to the full range of HPOS information and services.

Services

Health Professional Online Services provides access to a range of information, services and programs including:

- Australian Immunisation Register (AIR)
- Centrelink Forms
- Child Dental Benefits Schedule
- Department of Veterans' Affairs
- My Health Record System – Organisation Registration

Manage your details, including:

- Administer delegates
- Update or add your banking and personal details
- View details about your provider number and create a new provider location
- Access track and scale information (ie 19AB exemption)

Access patient information:

- Find a patient and check Medicare numbers
- Concessional entitlement verification
- View patient care plan history

Communicate with Medicare:

- Message
- View statements and subscriptions
- Upload documents
- Upload selected forms

Access useful MBS and PBS functions:

- MBS items online checker
- MBS partial payment calculator
- MBS Online
- PBS Schedule

Online user and quick reference guides

A series of online user and quick reference guides are available from the Medicare Australia website:

- <https://www.humanservices.gov.au/health-professionals/services/medicare/hpos>

What is PRODA?

PRODA (Provider Digital Access) is a new way to securely access HPOS. It is an alternative to the Medicare Individual PKI certificate. Once you have registered for PRODA, you access HPOS with a username, password and verification code. An advantage of PRODA is that HPOS can be accessed from any device that has internet access including a tablet or smartphone. If you have a PKI Certificate, you still need to register for PRODA and then both can be used. PKI Individual Certificates will eventually be phased out.

What is a PKI Certificate?

Health care providers need a Medicare Public Key Infrastructure (PKI) certificate to access online services. PKI certificates ensure that information you submit through the HPOS portal is secure.

The Department of Human Services issue PKI certificates to individuals and organisations in the health sector.

More information

For more information about, PRODA or PKI certificates, contact:

Telephone 1800 700 199

For HPOS information contact:
