

SMART REFERRALS WEBINAR – LEARN THE ROPES

This webinar is designed for General Practitioners and practice staff.

Smart Referrals are digital referrals integrated with Best Practice and Medical Director to enable faster, streamlined management of specialist referrals to Queensland public hospitals.

The system has many exciting features including:

- condition specific referral information that auto-populates from the patient file
- an easy way to attach documents from your computer or clinical software
- a comprehensive directory that lists service locations and estimated wait times.

During this webinar you will see a live demonstration of the Smart Referrals system including a referral being generated from start to finish. Information on the registration and set up process will also be briefly outlined.

Date: Wednesday 5th February, 2020

Time: 12.30pm-1.00pm

RSVP: by Tuesday 4th February

Registration is essential: Visit bsphn.org.au/education or the direct link
