EIGHT MILE PLAINS, QLD, 4113

**Register early as places are limited and will fill quickly.**  
To register - Go to <https://www.benchmarkgroup.com.au/course-enrolment/2307>

The Course in Immunisation Practice in Primary Healthcare is designed to upskill students (clinicians) to perform a range of comprehensive immunisation services, and remain up to date with current vaccination programs, changes, and requirements to their scope of practice. The course includes online learning completed via BenchmarkIQ, half-day face to face workshop, in-class activities and a mandatory third party observed workplace activity. **The fee to attend and complete this course is \$375.00 per student.**

The online component consists of two learning modules and assessment. Content includes areas such as, systems and processes to deliver immunisation services, coordinate an Immunisation Catch-Up schedule, and determine and communicate Immunisation needs for women in pregnancy, influenza vaccination, adult and older persons and school immunisation programs.

The face-to-face workshop involves practical workshop activities involving cold chain management and administration of vaccines in a simulated environment. Practice and assessment are performed on a mannequin, with the practical assessment conducted during the skills activity session.

**Please allow enough time to have completed the online learning modules 21 days prior to your workshop start date (estimated hours of study is 30 hours).** For further information on the Course in Immunisation Practice in Primary Healthcare, please visit [www.benchmarkgroup.com.au](http://www.benchmarkgroup.com.au). Please note, this course does not qualify successful students to administer vaccinations without the authorisation of a medical officer.
